Dan,

Your CCW Training Class we attended recently was informative, enjoyable and clearly showed your passion for teaching. Although it must have been difficult at times, you were very patient with students that clearly needed more personal attention.

In addition, your professional approach and dedication to the subject should be commended. You obviously believe that people should have the right to carry a weapon. Your message includes requirements prior to being entrusted with this privilege – along with proper training, attitude, and understanding the responsibility .

Thank you for the excellent training, we will definitely recommend your training to others.

We intend to enroll in the advanced courses you offer, and look forward to shooting at your range.

Sincerely,

Dave and Carol Cuffman
